

Patient Name: **Doe, John**
Accession No: 63511
Doctor/Clinic: **Janet Overlake**

Age:
Test ID: 435270

Date of Birth:
External ID:
Data File: **13FEB00747**
Technician: WC

Date Collected: 2/15/2013
Date Received: 2/15/2013
Date Run: 2/20/2013
Date Reported: 2/21/2013

Fax#:
Comments: NONE

Doctor ID: 6186

RESULT	Reference Range	ALLERGEN	NOT SAFE		
			Low	Moderate	Avoid

98	Low	<154 154 - 479 >479	Mushroom	[Bar]	[Bar]

MVL Allergy procedure uses both IgE and IgG4 antibodies for combined testing.

Due to literature documented test sensitivity limitations, a negative serum allergy test should not be used to justify exposure to an allergen that is clinically suspected as the cause of an anaphylactic reaction.
Volcheck GW. Postgrad Med. 2001 May;109(5):71.
