Collection Instructions

If collecting for E-95, A-95, P-47, Combo or Inhalant Panel only, draw two SSTs. If adding an Inhalant to a E-95, A-95, or Combo, then draw three SSTs.

Allow at least 20 minutes for the blood to clot.

Centrifuge for at least 15 minutes.

Place the separated serum into the transfer tube. Make sure the tube is capped tightly.

Label tube with patient name, date of birth and date of collection.

Stretch Parafilm over and around cap to prevent the sample from leaking. With one thumb hold the end of the Parafilm against the cap, with the opposite hand gently pull and stretch the Parafilm around the outside of the cap. It is best to wrap around the cap a couple of times. **DO NOT PLACE PARAFILM UNDER CAP.**

Complete the enclosed requisition; including payment (if required).
